4. ☐ Examiner's Comment Regarding Requirement for Deposit
of Biological Material
5. ☐ Notice of Informal Patent Application
6. ☒ Interview Summary (PTO-413),
Paper No./Mail Date 20080115.
7. ☒ Examiner's Amendment/Comment
8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____.

Examiner's Amendment

1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this Examiner's amendment was given in a telephone interview and/or FAX request with Mr. Scott Brairton on January 11, 2007.

The application has been amended as follows:

- Claim 14, at the end of the claim: the following phrase was inserted: "; and wherein said leakage magnetic flux density is 35 mT to 200 mT"; and
- Claim 15, at the end of the claim: the following phrase was inserted: "; and wherein said leakage magnetic flux density is 35 mT to 200 mT".

Reasons for Allowance

3. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious a permanent magnetic ring comprising a plurality of unit permanent magnets meeting Applicants' claimed limitations.

While the prior art of record disclose the known concept of forming permanent magnetic rings comprising a plurality of unit permanent magnets, the prior art of record fail to provide sufficient specificity to teach or render obvious the plurality of unit permanent magnets comprising uniaxial anisotropic magnets meeting the claimed N

and S pole limitations, combined with the claimed relative strength of the attracting force on said N and S poles relative the magnetic action caused by the leakage magnetic flux density, wherein the leakage magnetic flux density is controlled to be within the range of 35 to 200 mT.

4. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Comments

5. In order to better clarify the record, the Examiner wishes to point out that the terms "strong", "strongly" and "weak" are sufficiently defined vis a vis each other so that no 112 2nd "relative term" rejection was deemed necessary (especially given the explicit limitation that the "weak" magnetic action is directed to a leakage magnetic flux density of 35 mT to 200 mT..
